U.S.S.R. COMPUTATIONAL MATHEMATICS AND MATHEMATICAL PHYSICS

Cover-to-cover translation of
Zhurnal vychislitel'noi matematiki i matematicheskoi fiziki
Published bi-monthly by Pergamon Press

HONORARY EDITORIAL ADVISORY BOARD

R. A. BROOKER (*Manchester*)
L. FOX (*Oxford*)
D. C. GILLES (*Glasgow*)
A. S. HOUSEHOLDER (*Oak Ridge*)
G. F. J. TEMPLE (*Oxford*)
A. THOM (*Oxford*)
J. H. WILKINSON (*N.P.L., Teddington*)

Scientific Translation Editor:
R. C. Glass, M.A., M.Sc.,
The City University, St. John Street, London, E.C.1.

Translators: J. Berry and D. E. Brown

Publishing and Advertising Office:
Pergamon Press Ltd., Headington Hill Hall, Oxford, OX3 0BW

Subscription Rates
1982 *Subscription rate* $560.00 (*including postage and insurance*)
Two year rate (1982/1983) $1,064.00
Subscriptions are only serviced after payment has been received and are not accepted for less than one year.

Subscription enquiries from customers in America should be sent to:
Pergamon Press Inc., Maxwell House, Fairview Park, Elmsford, NY 10523, *U.S.A.,*
and for the remainder of the world to:
*Pergamon Press Ltd., Headington Hill Hall, Oxford OX*3 0*BW, U.K.*

Microform Subscriptions and Back Issues
Back issues of all previously published volumes are available in the regular editions and on microfilm and microfiche.
Current subscriptions are available on microfiche simultaneously with the paper edition and on microfilm on completion of the annual index at the end of the subscription year.

LIST OF CONTENTS

Number 1

G. P. Vasil'chenko and A. A. Svetlakov	1	A projection algorithm for solving systems of linear algebraic equations of high dimensionality
V. I. Meleshko	9	The solution of ill-posed stochastic algebraic equations
G. D. Maistrovskii	28	A locally quadratically convergent method of constrained minimization using a modified Lagrangian
F. P. Vasil'ev	41	Regularization of ill-posed problems of minimization in approximately specified sets
L. G. Khachiyan	53	Polynomial algorithms in linear programming
B. S. Pariiskii	73	Computing time and memory economies for different pivotal condensation methods
A. D. Ziv and B. A. Samokish	80	*A posteriori* estimation of the inverse operator of the degenerate two point boundary value problem
V. A. Medvedev	88	Interpolation expansions of solutions of elliptic second-order differential equations
Nguen Tyung	101	Uniform convergence of difference schemes of increased order of accuracy for Poisson's equation
A. A. Amosov, N. S. Bakhvalov and Yu. I. Osipik	110	Iterative processes for the problem of stationary heat exchange in a system of absolutely black bodies
S. A. Maiorov, A. A. Rudenko and A. V. Shipilin	120	Numerical solution of the system of equations for the potential and charge carriers in a semiconductor structure
V. V. Smelov	129	Symmetrization of the odd P_{2N+1}-approximation of single-velocity transport equation
Yu. I. Mokin	143	Features of the ill-posed problems that arise in the study of electron motion in an electromagnetic field
B. I. Brusnikin and I. N. Molchanov	159	Analysis of a mathematical model of disc design
M. N. Moskal'kov	177	Completely conservative scheme for gas dynamics
A. V. Kuz'min, V. L. Makarov and G. V. Meladze	187	A completely conservative difference scheme for gas-dynamic equations in Eulerian variables
V. I. Kireev and U. G Pirumov	199	The calculation of stationary supersonic flows with non-equilibrium chemical reactions
V. V. Aristov and F. G. Cheremisin	208	The conservative splitting method for solving Boltzmann's equation
L. S. Klabukova	225	The differential operator of problems of the theory of momentless elastic shells and their solution by the variational-difference method

Short Communications

A. A. Abramov	245	An elimination method for linear problems
Yu. M. Girschovich	250	The norm of the error functional of a quadrature formula of the Gregory type
N. V. Karetkina	257	An unconditionally stable difference scheme for parabolic equations containing first derivatives
V. I. Zubov	263	The optimal wing profile in the flow of an ideal incompressible fluid
L. N. Tarasenko	268	Numerical solution of the problem of toroidal axisymmetric flows with a free boundary

USSR20:6 Q

G. P. SHINDYAPIN — 273 Numerical solution of the problem of the irregular reflection of a weak shock wave from a rigid wall in an ideal gas

273 Reviews of new books

Number 2

V. A. SOKOL and N. T. TYNYANSKII — 1 An approximate method of solving the linear time optimal problem

E. I. VOLYNSKII, S. I. KAS'YANENKO and M. Z. KHENKIN — 13 A method of weakening the constraints in constrained extremum problems

YU. A. BELOV — 24 Monotonicity with respect to functional of an iterative algorithm for the block problem with random parameters

V. V. FEDOROV — 32 The stability of a design process

M. I. STRONINA — 43 Mathematical analysis of a class of continuous models of population dynamics

R. Z. DAUTOV, A. V. LAPIN and A. D. LYASHKO — 62 Some mesh schemes for quasi-linear elliptic equations

G. SHTOIAN — 79 The asymptotic stability of some economic difference schemes

V. V. NEKRASOV — 89 A standard procedure for integrating a system of quasi-linear partial differential equations of hyperbolic type

V. L. MAKAROV and A. A. SAMARSKII — 102 Use of exact difference schemes for estimating the rate of convergence of the method of straight lines

N. V. MUZYLEV — 120 Uniqueness theorems for some converse problems of heat conduction

T. K. KORSHIYA, V. F. TISHKIN, A. N. FAVORSKII and M. YU. SHASHKOV — 135 A variational approach to the construction of difference schemes on curvilinear meshes for the heat-conduction equation

A. A. ZLOTNIK — 155 The rate of convergence of the projection–difference scheme with a splitting operator for parabolic equations

V. G. KORNEEV — 165 On the approximate solution of problems of plastic-flow theory for media obeying Coulomb's yield criterion

V. I. MAZHUKIN, A. A. UGLOV and B. N. CHETVERUSHKIN — 182 Numerical investigation of the problem of laser breakdown of a dense gas

G. YA. SLEPYAN — 191 Rigorous solution of the problem of the diffraction of a plane wave by a periodic structure with impedance conditions

A. F. FILIPPOV — 202 Singularities on wavefronts, arising on diffraction by a polyhedron

V. B. GLASKO and YU. I. KHUDAK — 213 Additive representations of the characteristics of plane-layered media and the uniqueness of the solution of converse problems

P. N. VABISHCHEVICH, L. M. DEGTYARËV and YU. YU. POSHEKHONOV — 222 Numerical solution of the direct and converse problem of MHD-equilibrium with the surface current

Short Communications

T. I. SAVËLOVA — 232 On the stable differentiation of functions

A. N. SMIRNOV and V. N. SHEVCHENKO — 238 Martin's algorithm and correct cutting planes for integer linear programming

L. T. ASHCHEPKOV — 245 Construction of the maximum cube inscribed in a given domain

I. F. POTAPENKO and V. A. CHUYANOV — 249 A completely conservative difference scheme for the two-dimensional Landau equation

M. I. LETAVIN — 254 The problem of controlling charged particle beams allowing for the self-charge

VOL. 20 1980

A. A. GLADKOV — 260 Numerical solution of non-stationary problems using integral equations for wave surface potentials

A. A. KRONBERG — 268 On the asymptotic approximation of the mathematical expectation of the number of steps of the ϵ-spherical process

S. N. MEDVEDEV — 272 A problem of integral geometry for a family of curves in a circular ring

V. YA. YAKOVLEV — 282 Some numerical results in the problem of the impact of a liquid drop on a solid surface

288 New books on mathematics

Number 3

1 Vitalii Arsen'evich Ditkin celebrates his seventieth birthday

I. N. MOLCHANOV — 3 Requirements on computing programs of linear algebra

V. A. BUSHENKOV and A. V. LOTOV — 14 An algorithm for analyzing the independence of inequalities in a linear system

V. I. MELESHKO — 25 Iterative methods of perturbed pseudo-inverse operators for calculating generalized solutions of non-linear equations

A. G. YAGOLA — 40 On the choice of regularization parameter when solving ill-posed problems in reflexive spaces

V. V. DITKIN — 53 Approximate calculation of eigenvalues with a parameter in the boundary conditions

B. N. PSHENICHNYI and L. A. SOBOLENKO — 62 Acceleration of the convergence of the linearization method for the constrained minimization problem

V. V. EFIMENKO and A. S. ZAGORUIKO — 74 Programming of direct integration methods for a multi-dimensional minimization problem

YU. E. MALASHENKO and A.-I. A. STANEVICHYUS — 82 Solution of a problem of integer-valued programming

Z. V. MOROZOV and V. V. FEDOROV — 90 Formation of a vector criterion on the basis of a binary preference relation

I. B. VAPNYARSKII — 101 Stability of the solution of standardization and unification problems with respect to accuracy of approximation

N. YU. BAKAEV and R. P. TARASOV — 109 The problem of transforming three-dimensional potential fields

YU. N. AKKURATOV and V. N. MIKHAILOV — 117 The method of boundary integral equations for solving non-linear heat transmission problems

N. B. ESIKOVA — 126 A method for the numerical solution of Vlasov's equation

YU. I. MOKIN — 134 Algorithm for calculating the emission current density in the beam-focussing problem

M. F. IVANOV and V. F. SHVETS — 146 The method of stochastic differential equations for computing the kinetics of a plasma with collisions

V. I. GRYN — 156 A scheme for calculating radiative transfer in a moving scattering gas

V. M. KOVENYA — 167 Application of the splitting method to construct economical difference schemes

A. N. KRAIKO, V. E. MAKAROV and N. N. TILLYAEVA — 181 On the numerical construction of shock-wave fronts

A. I. ZELICHENKO — 188 The construction of an optimal linear threshold decision rule

K. V. RUDAKOV — 200 The correctness of recognition algorithms of the potential function type

A. S. GLAZUNOV 208 Recognition of continuous curves in a class of biomedical experiments

Short Communications

V. N. MIZGAILOV and V. V. MUKHIN 223 An iterative algorithm for solving systems of linear equations with a constraint on the norm of the solution

B. P. PUGACHËV 226 Cases of divergence of the least squares method when solving non-linear systems of equations

V. V. LEONOV and V. A. FIRSANOV 229 A modification of the gradient method of minimizing functions

A. F. SHCHERBININ 234 An optimal sampling method

V. A. DMITROVSKII 240 Estimation of the error in the multiparameter Monte Carlo method

V. V. KRAVTSOV 245 The problem of when a basis in L_2 is formed by a system of meta-harmonic functions

N. N. VOITOVICH 249 On the naturalness of the boundary conditions in the variational method of solving boundary value problems

A. V. ADEEV and A. S. MEL'NICHENKO 256 Estimation of the difference between adsorbed and radiated energy in the radiative heat transfer problem

YU. I. ROMASHKEVICH 261 Calculation of non-equilibrium plasma flow by Godunov's method

L. V. SHURSHALOV 265 The choice of the initial divergent form of the equations for calculating axisymmetric flows by finite-difference methods

YU. YU. FINKELSHTEIN 274 On the polynomial algorithm of ϵ-optimization in the multidimensional knapsack problem

O. A. SHCHERBINA 276 A local algorithm for integer optimization problems

280 New books on mathematics

VOL.
20
1980

Number 4

A. L. AGEEV 1 Regularization of non-linear operator equations in the class of discontinuous functions

V. A. KURCHATOV 10 The method of difference linearization, optimal with respect to the order of the error of numerical differentiation

P. L. TYUTYUNNIKOV 26 Determination of the coefficients of the sum of exponential terms by the supplementary integral variables method

V. F. DEM'YANOV and L. N. POLYAKOVA 34 Minimization of a quasi-differentiable function in a quasi-differentiable set

S. V. RZHEVSKII 43 Unified approach to solving unconstrained minimization problems

N. N. ASTAF'EV 51 Dual regularization of linear programming problems

A. I. GOLIKOV and V. G. ZHADAN 62 Iterative method for solving non-linear programming problems, using modified Lagrange functions

E. R. AVAKOV 78 Approximation conditions for the lexicographic problem

A. A. ABRAMOV 91 Behaviour of boundary conditions transferred to the neighbourhood of a regular singular point

K. BALLA 100 Solution of singular boundary value problems for non-linear systems of ordinary differential equations

L. ALEKSANDROV 116 Approximate solution of eigenvalue problems for high-order linear differential equations

M. B. UREV 133 The axisymmetric Cauchy problem for Laplace's equation

S. M. MANUKYAN — 143 Solution of the boundary value problem for the equation of mixed type when surfaces of discontinuity are present

V. V. VARLAMOV and S. A. GABOV — 160 Application of Watson's method to a problem of the theory of waves on the surface of a heavy liquid

A. A. DANILOV and V. I. IVANOV — 175 Corrections to the Fock asymptotics for the diffraction field near surfaces of non-constant curvature

A. V. BOBILEV, I. F. POTAPENKO and V. A. CHUYANOV — 190 Kinetic equations of the Landau type as a model of the Boltzmann equation and completely conservative difference schemes

O. S. MAZHOROVA and YU. P. POPOV — 202 Methods for the numerical solution of the Navier–Stokes equations

A. I. ZHMAKIN and A. A. FURSENKO — 218 On a monotonic shock-capturing difference scheme

Z. A. SMUL'YANINOVA — 228 On the stability of a correct algorithm

Short Communications

V. V. ERMAKOV and N. N. KALITKIN — 235 Two stage gradient descent

I. K. DAUGAVET — 243 The iterative solution of equations arising in the compact approximation of linear operators

V. V. NEKRUTKIN and B. B. POKHODZEI — 248 A method of modelling a binomial distribution

I. E. KAPORIN — 253 A new fast Fourier transform algorithm

A. A. BYKOV — 259 A numerical method of solving multidimensional integral equations

V. YA. TERESHCHENKO — 265 The Ritz procedure for constructing approximate solutions of problems of elasticity theory by the generalized Trefftz method

V. V. ARISTOV, A. A. MAKHMUDOV and S. P. POPOV — 269 Solution of the unsteady problem of the evolution of a discontinuity in a viscous heat-conducting gas

E. N. GORDEEV and V. K. LEONT'EV — 275 Stability in bottleneck problems

YU. A. MAMATOV — 281 A method of synthesizing planar disjunctive normal forms for logical algebra functions

Scientific Information

Letter to the Editor

O. N. BONDAREVA — 284 Note on the paper "Convergence of spaces with a relation and game—theoretic consequences"

285 Book Reviews

Number 5

1 25 Years of the Computing Centre of the Academy of Sciences of the U.S.S.R.

V. A. DITKIN, K. A. KARPOV and M. K. KERIMOV — 3 The computation of special functions

A. F. KONONENKO — 13 The structure of the optimal strategy in controlled dynamic systems

D. A. MOLODTSOV — 25 Stability and regularization of optimality principles

V. A. BUSHENKOV and A. V. LOTOV — 38 Methods and algorithms for analyzing linear systems, by constructing generalized sets of attainability

I. I. GASANOV and YU. S. RAGIMOV — 49 A control problem in a two-level hierarchical system

A. A. ABRAMOV, V. V. DITKIN, N. B. KONYUKHOVA, V. S. PARIISKII and V. I. UL'YANOVA — 63 Evaluation of the eigenvalues and eigenfunctions of ordinary differential equations with singularities

O. M. Belotserkovskii, A. I. Erofeev and V. E. Yanitskii — 82 A non-stationary method of direct statistical modelling of rarefied gas flows

Yu. D. Shmyglevskii — 113 Variational problems of gas dynamics

O. S. Ryzhov — 127 Asymptotic methods in fluid dynamics

A. A. Charakhch'yan and Yu. D. Shmyglevskii — 151 Numerical methods in radiative gas dynamics

V. A. Rykov, F. G. Cheremisin and E. M. Shakhov — 168 Numerical investigations in rarefied gas dynamics

A. N. Biryukov, V. M. Kurochkin and V. A. Serebryakov — 185 Global attributes and their use in the description of programming languages

Yu. I. Zhuravlëv, A. A. Zenkin, A. I. Zenkin, I. V. Isaev, P. P. Kol'tsov, D. V. Kochetkov and V. V. Ryazanov — 195 Recognition and classification problems with standard training information

Short Communications

V. I. Tsurkov — 211 Decomposition in the optimization of systems with elliptic equations

M. K. Kozlov, S. P. Tarasov and L. G. Khachiyan — 223 The polynomial solvability of convex quadratic programming

A. V. Mishchenko and B. G. Shushkov — 229 The problem of the optimal distribution of resources for a net model with linear constraints on the time for completing jobs

V. A. Razzhevaikin — 235 The instability of stationary inhomogeneous solutions of the Cauchy problem for the quasilinear parabolic equation and its ecological applications

V. A. Gushchin — 241 Numerical investigation of an incompressible viscous fluid flow about a body of finite size

V. N. Volosov and M. S. Pekker — 251 Numerical methods of solving the two-dimensional problem for the Fokker–Planck equation

S. A. Abramov — 258 Models of sets of sequences and the proof of the correctness of programs

L. V. Baskakova — 262 A recognition algorithm with threshold parameters

Scientific Information

A. P. Mikhailov and Yu. I. Popov — 267 The All-Union School for Young Scientists on "Theoretical and Applied Problems of Numerical Mathematics"

VOL. 20 1980

Number 6

1 Anatoli Alekseevich Dorodnitsyn celebrates his seventieth birthday

G. I. Marchuk — 3 Economic criteria for the planning, preservation and restoration of the environment

A. N. Tikhonov — 10 Approximate systems of linear algebraic equations

V. M. Glushkov, M. F. Kaspshitskaya and I. V. Sergienko — 23 Formalization and solution of a class of discrete optimization problems

O. M. Belotserkovskii and V. G. Grudnitskii — 37 Study of non-stationary gas flows with complex internal structure by methods of integral relations

A. A. Samarskii — 52 Numerical methods for solving multi-dimensional problems of mechanics and physics

V. M. Kovenya, G. A. Tarnavskii and N. N. Yanenko — 100 Implicit difference scheme for the numerical solution of three-dimensional equations of gas dynamics

E. I. NAZHESTKINA and V. V. RUSANOV 117 Approximation of boundary conditions in difference schemes

V. V. SYCHEV and VIK. V. SYCHEV 133 On turbulent separation

V. I. ZUBOV, V. M. KRIVTSOV, I. N. NAUMOVA and YU. D. SHMYGLEVSKII 146 Computation of the interaction of laser radiation with an aluminium vessel and its vapour

P. I. CHUSHKIN 158 A cone with slight blunting in a supersonic flow at an angle of attack

A. L. NI and O. S. RYZHOV 168 Transonic flows of a multicomponent relaxing mixture through a Laval nozzle

M. N. KOGAN 185 On the equations of gas dynamics

S. A. GABOV and A. G. SVESHNIKOV 195 The long-wave asymptotics of Green's function of the problem of waves on the surface of a stratified liquid

M. K. KERIMOV 212 Methods of computing the Riemann zeta-function and some generalizations of it

YU. D. SHMYGLEVSKII 231 A variational principle of gas dynamics

A. S. KHOLODOV 234 The construction of difference schemes of increased order of accuracy for equations of hyperbolic type
